

## AMETEK® Precitech, Inc. delivers 21<sup>st</sup> ultra precision machine to AXSYS IR Systems.

Because AMETEK® Precitech, Inc. has in-house design and manufacturing capabilities, we know the machine we receive has the highest quality control and best delivery time that can be expected. Therefore this allows Axsys to have less down time and higher production.

**Don Morrison**  
Senior Process Engineer

AMETEK® Precitech, Inc., the global leaders in Ultra Precision Technologies based out of Keene NH. USA, is proud to announce that Axsys IR Systems has purchased their 21<sup>st</sup> Ultra Precision machine due to be delivered to their Nashua, NH location – December 2007.

The two companies share a strong and outstanding business relationship, each with an understanding of the others capabilities and that has made this all possible.

We are looking forward to offering Axsys IR Systems the service and expertise they have come to expect in AMETEK® Precitech, Inc.

**Mike Janish**  
Precitech Business Unit Manager

Axsys IR Systems is a vertically integrated supplier of thermal imaging cameras and precision optical solutions for high technology applications, serving the aerospace, defense, and high performance commercial markets.

Precitech is the leader in Ultra Precision Technology and serves a global customer base capable of machining components to nanometric levels of accuracy. For more information about Precitech please visit our website at [www.precitech.com](http://www.precitech.com).

This is an exciting opportunity for us at Axsys IR Systems. AMETEK® Precitech, Inc. is a dynamic Ultra Precision company and a proven leader in the industry.
